

OzTec Shock Absorbers

OzTec Suspension is a first class range of 4WD suspension components research, developed and tested by GSA Wholesale Suspension in Australia to suit Australian conditions.

Development

Using the latest computerised shock dyno, the valve forces have been engineered to obtain the best all round suspension control resulting in improved ride quality with superior handling and braking.

GSA have taken the product range a step further by developing both "Comfort" for lightly loaded vehicles with minimal accessories where comfort is the priority as well as the "Cargo" range that are designed to control the the extra weigh of steel bull bars, roof racks, winches, long range fuel tanks and the like add to a vehicle. You will be able to find an OzTec shock to suit your needs.

Local Support

Capital Steering & Suspension is the exclusive ACT distributor of OzTec shock absorbers, keeping an extensive range at our Fyshwick workshop
